The total Installed Capacity decreased by 1.9% (79 MW), compared to the year 2020. The installed capacity of major hydro power plants represented 33% of the total capacity. The Non- Conventional Renewable Energy (NCRE) plants including Mini Hydro represent 19% (i.e. Mini Hydro - 10%, Wind, Solar, Dendro, Biomass and Municipal Waste represented 9%). CEB power stations represented 73% of the total installed capacity. Commissioning of 103.5 MW Thambapawani wind power station was a major achievement in contribution to green energy from CEB generation sector. The first 31 MW of Thambapawani Wind Power Station was commissioned in December 2020 via 33 kV network. The total capacity of the plant with 30 number of wind turbines was connected to 220 kV network and commissioned successfully on 28th

April 2021. In addition, 3 mini hydro power plants and 25 solar power plants were added to the system by the Independent Power Producers (IPP).

During the year 2021, the installed capacity of IPP thermal plants were reduced from 614 MW to 433 MW. Plants owned by ACE Power (Embilipitiya) Ltd (100 MW) and ACE Power (Matara) Ltd (20 MW) were retired on 06th and 08th April 2021 respectively. Asia Power (Pvt) Ltd (51 MW) was decommissioned after contract completion on 11th April 2021. The 10 MW power plant in Galle operated by V Power Holdings (Pvt) Ltd was retired on 3rd January 2021. As a result the IPP thermal capacity decreased by 181 MW compared to 2020.

Electricity Generation

The total Electricity Generation (Net) (CEB & IPP) during the year 2021 was 16,716 GWh. The net generation increased by 6.4% compared to 2020. The average daily generation was increased from 42.93 GWh/day in 2020 to 45.80 GWh/day in 2021. More details of Gross Generation and Auxiliary Consumption are given in the pages 63-64 of this report.

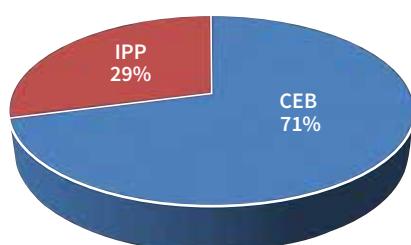

During the year under review CEB power stations generated 12,711 GWh representing 76% of the total electricity generation. The share of power produced by the private sector was 24% in the year 2021. The

generation from CEB hydro power plants were 5,640 GWh which was 33.7% on the total generation of the year and 44.2% increase with compared to year 2020. Meantime coal power generation contributed 33% of the total electricity generation in this year. CEB thermal (oil & coal) generation decreased by 466 GWh from 7,219 GWh in 2020 to 6,753 GWh representing 40% of the total electricity generation in 2021.

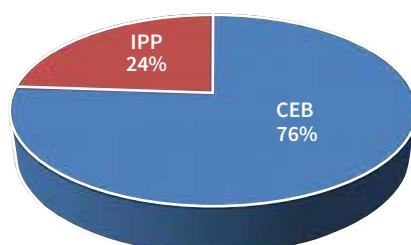

Details of Gross Generation of power stations are given in pages 65-78 and details of the Monthly Station Consumption and Net Generation of Power Stations are given in pages 79-81.
